Pretul estimativ: 7.387,21 RON - 7.387,21 RON

Descriere: View of the splicerSide view with open lidClose-up on the electrodesView of the toolbox. The retractable tray can hold fiber cleaver.Other included accessories: bottle for IPA alcohol, univerval stripper, set of spare electrodes, flat cables stripper, cleaning brush.Includes power supply with USB adapterCarrying belts for both: splicer and toolbox. A set of keys for closing the box.Signal Fire AI-9 is the latest model from the line of optical fiber splicers, which have been successfully used in fiber optic installations of various categories for several years. Thanks to the fine-tuning of the software and an even better optimization of the splicing process, the entire process has been shortened to just 5 seconds. However, the most important feature of the new model is built in optical power meter module and visual fault locator . This allows for quick diagnostics of the optical path immediately after making a splice.The AI-9 model is equipped with an optical power meter and a visual fault locator modules.Signal Fire AI-8C fusion splicertoolboxset of spare electrodesfiber cleaveruniversal stripperstripper for flat cablesbottle with dispensercleaning brushcarrying belts (for the splicer and the box)AC charger with USB adapterSignal Fire is a proven solution in the market of fiber-optic fusion splicers. Despite of advanced fiber positioning and splicing technique, the device is offered for a very competitive price. The working comfort will be appreciated by both beginner and adv
