Pretul estimativ: 900,00 RON - 900,00 RON

Descriere: Gel Loading Dye, Purple (6X) - 4,0 ml Cod: B7024S No UV Shadow. Contains SDS for improved band sharpness. Contains EDTA to stop enzymatic reactions. Compatible with agarose and non-denaturing polyacrylamide gels. Gel Loading Dye, Purple (6X) is a pre-mixed loading buffer which contains a combination of two dyes, Dye 1 (pink/red) and Dye 2 (blue). The red dye serves as the tracking dye for both agarose and non-denaturing polyacrylamide gel electrophoresis. The two dyes separate upon gel electrophoresis; the red band is the major indicator and migrates similarly to Bromophenol Blue on agarose gels. This product is packaged as 4x1 ml vials. Producer: New England Biolabs. Termen de livrare: 45 de zile de la comanda ferma/contract.
