Descriere: The aim of this market survey is to obtain the market's input and comments on possible imminent procurement of an electric wheeled excavator for Trondheim city operations. The reason for this is a possible competition, justified by reservation for the financing. The purpose of the survey is to map the market that offers electric wheeled excavators and which products are offered. Suppliers in the market are therefore encouraged to register their interest, provide input and products so that we ensure the best possible competition in the event of a notice. Tenderers are requested to enclose brochures, product sheets or other information about specifications, areas of use and capacities if interested in registering their interest. The deadline for responding to the RFI is set for Friday 22.12.2023.
