-----------------	----------	------------	--

Descriere: Larvik municipality ("contracting authority") hereby invites tenderers to a competition for contract M1 Water treatment - separation and bio-stage. The contract includes all treatment processes based on sand and grease traps to outlets for the Lillevik Treatment Facility project ("Lillevik RA"). The contracting authority is the owner and operator of Lillevik RA. The current treatment plant removes organic matter (BOF and KOF) and phosphors. The procurement is for an expansion of the treatment plant with facilities that remove nitrogen by biological processes. An extension shall be constructed for the execution of water treatment (bio-phases and separation). Several procurements will be made in the project. See the description of this procurement in point II.2.4).
