Descriere: Liverpool John Moores University and the University of Liverpool have created a joint venture company; Sensor City Liverpool Ltd to establish a unique sensor-systems business incubator focused on creating, nurturing and establishing commercially viable hi-tech companies. The project is to develop a bespoke new building in the Copperas Hill redevelopment zone at the heart of Liverpool knowledge quarter. The new building should provide flexible laboratory and office space whilst encouraging collaboration. Sensor City Liverpool Ltd is looking to appoint a contractor in a two stage design and build procurement process. The project envisages a single phase programme of delivery and construction commencing early 2016 and completing early 2017. Further details regarding the 2 stage (D&B) and construction phases are detailed within the Pre-Qualification Questionnaire (PQQ) and Tender documentation.
