Pretul estimativ: 16.500,00 RON - 16.500,00 RON

---

Descriere: Accel-Amplicon Comprehensive TP53 Panel AL-53048 Swift - kit 48 samples Robust performance on cell-free DNA and FFPE samples • Inputs as low as 10 ng • Highly sensitive detection of rare variants down to 1% allele frequency • Easy, single-tube assay with sequence ready libraries in under 2 hours • Streamlined analysis with bioinformatics resources including Primerclip and Genialis • Compatible with all Illumina sequencers Complete coverage of the tumor suppressor gene involved in cell cycle, DNA repair and programmed cell death The Accel-Amplicon Plus Comprehensive TP53 Gene Panel offers complete coverage of the entire coding sequence and flanking exon/intron boundaries of the TP53 gene. It's fully compatible with difficult and low input samples, such as FFPE and cell-free DNA for liquid biopsy analysis. Comprehensive: Covers 1,000 COSMIC and 700 ClinVar mutations and generates targeted libraries compatible with Illumina® sequencing Powerful: Simultaneous detection of single nucleotide variants (SNV) and small insertions and deletions (indels), all within a fast and easy single-tube assay workflow. Flexible: Layer on pre-validated content from other Accel-Amplicon Plus Panels (e.g. BRCA1 and BRCA2 Panel, Lynch Syndrome) or your own targets. The possibilities are endless. PREZZENTA TIME LOC DE COMANDA FERMA!
