Descriere: Ringerike municipality shall establish a new water treatment plant that is connected to Ringerike Waterworks. The water treatment plant shall have the capacity to deliver to at least 60 000 persons. The development shall take place because the production wells have rising manganese values and several of the wells are above the threshold value. There is therefore a need to remove the manganese from the water before it is distributed in the network. In addition there is a need to increase the capacity of the elevated basin in order to ensure reliable delivery. The basin capacity shall be expanded from 2 000 m to 5 000 m .Ringerike kommune, c/o the Development Section, invite tenderers to an open tender contest for the purchase of project manager services for the execution of Kilemoen water treatment plant.The contract is awarded to Sweco Norge AS.
