Descriere: Kit de detectie coronavirus RT-qPCR (SARS-CoV-2) Kit, Certificat CE/IVD, 100 reactii EliGene COVID19 BASIC A RT kit (REF: 90077-RT-A) is intended for the detection of SARSCoV-2 viral RNA from nasopharyngeal swabs, buccal swabs, sputum, saliva, serum, plasma and other clinical samples by one-step RT-qPCR assay. Benefits: CE mark WHO approved primers and probes Increased sensitivity and specificity due to the amplification of 3 independent SARS-CoV-2 targets in a single PCR reaction HEX-labelled RNA-based internal control for the reverse transcription control Suitable for RNA isolated from all types of clinical samples Special technology developed in EU by Elisabeth Pharmacon company Compatible with all Elisabeth Pharmacon viral isolation kits mai putin EliGene® Viral RNA/DNA FAST Isolation Kit is intended for fast isolation (in 15 minutes) of viral RNA and DNA (nucleic acids - NA) from buccal swabs, sputum and saliva utilizing our special inhibitors removal technology. Designed for testing of SARS-CoV-2, influenza viruses etc. Extra fast 15 minutes protocol High yield of purified viral RNA/DNA Special technology developed in EU by Elisabeth Pharmacon company Tested on clinical samples. Isolated nucleic Acids are ready to use for RT-PCR, RT-qPCR and other downstream applications mai putin
