Descriere: A sewage installation shall be upgraded on the South side of Rukkedøla, over the Engen property. Water and sewage pipelines shall be laid in 2 river crossings and the sewage pipeline shall be connected to the existing facility. Furthermore, it shall be cleared up in Rukkedøla's river course, with mass clearing and development of 3 flood embankments. Rukkedøla also took new river courses over pastures under Hans, in this area rocks shall be cleared and levelled out top soil. This is mainly summed up to the following:

- Excavation/blasting of approx. 180 m of W&S ditch with laying of sewage pipeline and water pipeline.
- 2 river crossings with river clearing, blasting for water and sewage ditch.
- Foundations, reinforcing, casting water and sewage pipelines in Rukkedøla and surface filling with large rock.
- Setting down 3 inspection manholes for wastewater.
- Establishment of 3 individual flood ramparts with a total length of approx. 435 m.
- Option for a 480 m W&S ditch with laying of a sewage pipeline and water pipeline on the south side of Rukkedøla over Engen, with setting down four accompanying sewage manholes.
- Option for laying conduits for high voltage in the same ditch race as the Water and Sewage.
