Pretul estimativ: 92.523,00 RON - 92.523,00 RON

Descriere: SISTEM DE CALCUL (PC, software specific si baza de date) - Windows® version of the NIST/EPA/NIH Mass Spectral Database, type 800500.) An easy-to-use, full-featured program. The world's most widely used mass spectral library, with access to more than 100,000 compounds. Including: Over 200,000 selected spectra. Spectrum-Matching Algorithms. Any peak Search. Incremental Name Search. Context-Sensitive Help. - QGA 2 gas analysis calibration and quantification PC software, type 800590 QGA 2 is a National Instruments LabVIEW application. A program providing quantitative gas analysis with a simple graphical user interface. Quantitative gas analysis of up to 32 gases and vapours. Multipoint calibration for quantitative gas analysis 10 peak spectral library with intelligent library scan feature. Intuitive Fragment selection tool based on expected concentration Gas/Vapour spectral calculator for analysis set up. Providing automatic subtraction of spectral overlaps, and with experiment specific fragment ratio assessment. Spectral simulator for a quick overview of the spectrum with user control to dynamically show changes. Real time data smoothing. Multiple data export formats, PDF, CSV and export of data on the fly. Supports data communication by OPC . Automatic triggering of the start of analysis from an external input. Data view with four y axes for simultaneous display of quantitative data, corrected data, raw data and/or external signals temperat
