Descriere: We seek a consultancy specialising in developing robust advocacy and communication strategies for our partners. The purpose of this consultancy is not just to assess our partner's current advocacy and communication frameworks but to support development where limited or no framework exists. By conducting a thorough evaluation and supporting strengthening of advocacy frameworks, partners will identify areas for improvement and develop tailored strategies that can significantly amplify our partner's voice and impact. Developed expertise will empower partners to enhance their advocacy efforts, strengthen communication with stakeholders, and achieve their organizational objectives more effectively, instilling a sense of hope and motivation in our collective efforts.
