Termenul limita pentru depunere:	14.12.23	Pretul estimativ:	3.500.000,00 NOK 3.500.000,00 NOK

Descriere: The contracting authority needs to enter into a service contract in accordance with NS 8402 for the implementation of the coastal water survey in the collaborating municipalities. The survey is included in a long-term monitoring programme to follow developments in condition in coastal water sources with emissions from municipal sewage facilities and other emissions from the municipalities around the Stavanger Peninsula. Some local monitoring points are included as regards monitoring of premises with particularly heavy load or where changes with the aim of improvements have been made or are ongoing. The works shall be carried out in accordance with Classification Supervisor 02:2018 Classification of the environmental condition of water. Ecological and chemical classification system for coastal water, ground water, lakes and rivers, which is published by the Directorate Group for the implementation of the Water Regulations, with the stated recipients in focus. Tenderers shall report to Monica Nedrebø Nesse. Monica Nedrebø Nesse will also be the contact point for the contract.
