

Hearing: CT for the Proton Centre at Helse Bergen HF

I.D.: 90536952

Data publicarii	01.12.23	Coduri CPV	33100000
-----------------	----------	------------	----------

Descriere: The Department for Cancer Treatment and Medical Physics at Haukeland University Hospital shall procure a new CT for the initiation of the new proton centre. Tenders are wanted for an advanced CT with functionality and accessories such as dual energy, contrast injector, lasers for patient marking, belt-free 4DCT and gating, intercom and surveillance cameras, and flat table top with IPPS indexing for use in planning radiotherapy. See the attached tender documentation for further information on the pending procurement. We are now publishing a hearing where we would like feedback on the tender documentation from the supplier market prior to the competition notice. We particularly want feedback on whether the requirements are unreasonable, unclear or contain errors, and whether there are generally other conditions that are unclear in the tender documentation. Deadline for feedback: 11.12.2023, 12:00. Please note that there can be changes in all competition documents before the competition is published and that any questions and input as a general rule will not be answered.
