
PowerQuant System, 800 reactii, Promega- VP MEDICINA LEGALA

I.D.: 44027038

Data publicarii	17.09.19	Coduri CPV	33696500-0
-----------------	----------	------------	------------

Pretul estimativ: 12.975,00 RON - 12.975,00 RON

Descriere: The PowerQuant® System is a 5-color, 4-target probe-based qPCR assay that quantifies the total amount of amplifiable autosomal and Y-chromosomal DNA in a single assay using the same DNA standards. This system provides flexible options for 4-point to 7-point standard curve. The kit contains an internal PCR control (IPC) to test for false-negative results that may occur in the presence of PCR inhibitors. -Trust your zero quantification results—zero means zero -Obtain reliable quantification results with more consistent auto/Y ratios - Maximize your success in STR assays with straightforward DNA quality assessment -Shorten time to results with a faster cycling time of approximately 1 hour The PowerQuant® System is optimized for use on the Applied Biosystems® 7500 Real-Time PCR System (Applied Biosystems® 7500 Software, Version 2.0.6) or Applied Biosystems® 7500 Real-Time PCR System for Human Identification (HID Real-Time PCR Analysis, Version 1.1 or 1.2).
