Pretul estimativ: 1.110,00 RON - 1.110,00 RON

Descriere: Tissue culture test plate, 96 wells, U-version (ambulate cate 6 buc) fund rotund, Sterile , Producator TPP Elvetia Material PS U-base (cutie 108 buc) no rims well suited for pipetting, used for agglutination tests and „+/-„ evaluations growth area: 0.36 cm² working volume: 0.31 ml Features of the TPP tissue culture test plates show highest operational standards quality : opto-mechanical treatment of growth area for optimal cell adhesion lid with air-venting system guarantees controlled gas exchange with low evaporation sloped edge allows placement of the lid in one position only yellow marking area on lid and plate ensure correct lid orientation: yellow on yellow - match! ridged grip area ensures a secure grasp and prevents from accidentally lifting off the lid clear alpha-numerical labelling between the wells for easy orientation during microscopy, easy to see black alpha-numeric on the side growth area on spherical zone only absolutely flat growth surface all TPP plate sizes (6, 12, 24, 48 and 96-well) stack securely together air vents in plate base prevent condensation and provide consistent air-flow between stacked plates crystal clear transparency manufactured meeting the standards ANSI/SLAS 1-2004 through ANSI/SLAS 4-2004 well geometries available:U-base TPP guaranties a „Sterility Assurance Level“ (SAL) of 10⁻³. The sterility is validated conforming DIN EN ISO 11137. TPP products are tested systematically with the LAL test to prove the absence of endotoxins. The Lim
