Descriere: Contract T43 makes up the last sub stretch of lot 4/5, Stovikeidet — Møllnes. The work involves the construction of a road in the open air along approximately the same corridor as the existing E6. Some of the contract is rock blasting and handling rock matter. A new tensioned concrete bridge shall be constructed over Møllelv. In addition a concrete culvert is included where the local road shall be led under the new E6. Otherwise there is an area where, due to geotechnical reasons, the matter shall be replaced. Concrete guidelines have been made for the measure's technical execution. T43 Stovikeidet — Møllnes has the following main work:— Main road, from profile 28800 — 32250. Length 3 450 m.— Secondary road/local road with access to the E6. Length approx. 1 000 m.— Securing high rock cuttings.— Tensioned concrete bridge over Møllelva.— Concrete culvert where a secondary road/local road is to be led under the E6. Lighting installations.
