

2023 - 6K - Purchase of cars

I.D.: 88167684

Data publicarii	17.10.23	Coduri CPV	34100000
Termenul limita pentru depunere:	20.11.23	Pretul estimativ:	8.000.000,00 EUR 8.000.000,00 EUR

Descriere: The municipalities of Dovre, Lesja, Lom, Sel, Skjåk, and Vågå intend to enter into a framework agreement for the purchase of new cars for use in the municipalities. The drivetrain is mainly electricity, but may also include hybrid, petrol, and diesel. This is in accordance with requirements for public car ownership. The municipalities have partially procured electric cars and an electric drivetrain will be preferred where possible. Fossil drivetrains will only be procured exceptionally. The supplier must include CO2 emission figures for any fossil vehicles based on the information in the Norwegian Public Roads Administration's "Nybilvelger" and corresponding emission figures for relevant alternatives. Sel, Skjåk, Lom, and Vågå participate in the agreement upon contract signing. Dovre and Lesja have the option to join the agreement. For further information about the content of the procurement, please refer to Part II Annex 1 Customer's requirement specification.
