Pretul estimativ: 1.171,10 RON - 1.171,10 RON

Descriere: Taq DNA Polymerase - 2.000 units M0267L Cod: M0267L Concentration: 5,000 units/ml. Size: 2,000 units. Taq DNA Polymerase is a thermostable DNA polymerase that possesses a 5' → 3' polymerase activity (1,2,3) and a 5' flap endonuclease activity. It is supplied with 10X ThermoPol Reaction Buffer, which contains a nonionic detergent to increase enzyme stability during longer incubations. Product Source: An E. coli strain that carries the Taq DNA Polymerase gene from *Thermus aquaticus* YT-1. Application: PCR, Primer extension, Colony PCR. Producer: New England Biolabs
