Descriere: Series 3800 Headset Typically Used by Bucket Operator during Wired Deicing Applications
The David Clark H3332 Headset/Microphone is designed specifically for your base's de-icing team. This state-of-the-art headset provides incredible noise attenuation and crystal clear reception. The H3332 de-icing headset features cushioned ear pads for additional comfort, even during inclement weather and extended wear. Also featured on this headset is an M-1/DC noise cancelling microphone, which will transmit clearly on noisy or windy runways. Use this David Clark product for hands-free use with its helpful microphone on/off switch. Our David Clark de-icing headset is built to resist the wear and tear of outside conditions. You can rely on this headset to deliver uninterrupted communication in any weather. This product is designed to last. The H3332 all-weather headset is equipped with a five foot coil cord for flexibility on the ground. This cord terminates with a weather-resistant PJ051 plug for your convenience.
