Descriere: The contracting authority shall procure an ERP system that shall include a financial system, payroll and HR system, as well as a procurement system. The contracting authority is Ulvik herad and Eidfjord municipality. A contract shall be established with one tenderer. There is a strong focus on efficient work processes, and a new ERP system shall support this. The system shall therefore have close integration between the administrative systems, not to mention the trade systems in the municipalities, so that double registrations and unnecessary work processes disappear. See the procurement documents for further information. A draft of the tender documentation is attached to this qualification documentation. The contracting authority reserves the right to make minor, not significant changes to this basis before tenderers are invited to submit a tender.
