Descriere: This tender has been prepared on behalf of the Welsh Ministers, herein after referred to as 'the Client', in order to establish a Framework Agreement that will provide SMART Innovation Diagnostics for Manufacturing and Design projects across Wales. This service shall form part of the SMART Innovation projects which will deliver advice and specialist support to help businesses with research and development, manufacturing, design, intellectual property, new product development, licensing and commercialisation — resulting in the creation of new products, processes, services, technologies and new technologically innovative businesses. The Client is seeking to engage with quality providers to deliver a service that will provide design and manufacturing diagnostics for businesses across Wales. The successful provider(s) will be awarded onto the Framework agreement which will consist of 2 lots. The selection of providers for individual call off contracts will be subject to rotation and is explained fully within the tender documents. The Framework Agreement will commence on the 1.5.2015 for a period of 3 years and will end on the 30.4.2018. An option to extend the agreement for up to a further year will be available to the Client; however this will be subject to a performance review. The client is not bound by any values or commitment with regards to the use of this agreement. A contract will not exist between the Client and the Framework Provider until such a time when a 'call off' occurs. Please note that the Client will seek EU funding in respect of this service.
