Descriere: FDW45 SolarFlex Lightning White Part of the SOLARIS® System 1. Description FDW45, SolarFlex Lightning White is a UV flexo first-down white ink intended for printing of labels, tags, sleeves, tickets and other applications found in the narrow web market where high opacity is required. 2. Product Features* · High opacity and good printability for maximum covering power. · Good adhesion to a wide range of filmic materials. · Good receptivity to other Solaris® System colours. · Low viscosity and good flow for optimum press performance. · Good gloss, scratch and scuff resistance · Formulated without VOC's, Benzophenone, ITX and 4-Methyl Benzophenone. · Suitable for use with high volume aniloxes for highest opacity. 3. Product Suitability* 3.1 Applications FDW45, SolarFlex Lightning White ink is intended for use in the following areas: o A first-down opaque UV Flexo white ink. o Paper or grades of top-coated plastic self-adhesive labels. o Other paper or board applications such as tags and tickets. o Other filmic applications where a high opacity covering white is required. FDW45, SolarFlex Lightning White ink is not suitable for use in the following areas: o Uncoated Thermal papers. o Primary food packaging unless there is an effective functional barrier. Plastic packaging and bottles will not usually provide an effective barrier to migration. Printers should assure themselves that use of these products on food packaging has been fully assessed for risk and the finished printe
