Descriere: St. Olavs Hospital shall procure an inoculator, hereafter referred to as the instrument. The specifications describe an instrument to be installed in the department of medical microbiology. The instrument shall be used for inoculating bacteriological samples. This included urine samples (the current contract partner delivers Vacuette) and eSwab (the current supplier delivers Copan). Estimated number of samples 110 000. The existing inoculator (WASP) and a new inoculator must be able to handle this volume of samples. This is an investment procurement for the year 2014, therefore the delivery, training, commissioning and approval protocol must be arranged so that the invoice can be sent well before 31.12.2014. The provision of the required training for all personnel who work in the affected units must be included in the delivery.
