Descriere: The British Council is managing EQUIPT ELT, a DFID-funded project whose anticipated outcome is to improve student capacity by improving the quality of teaching in Tanzania at primary and secondary levels, with a specific focus on English for communication. A central project output is strengthened capacity to deliver effective programmes to support teaching through the medium of English. A key objective is to provide new and revised training materials to strengthen teaching through the medium of English for approval by the Ministry of Education and Vocational Training (MoEVT). Baseline is a six-week Form One orientation course component which is supported by an illustrated Student's Book and Teacher's Guide covering language, social sciences, maths and science. We wish to contract a company to print the revised Student's Book as well as copies of the Teacher's Book within the required time frame and to the required quality standards.
