---

Descriere: The Danish Defence Acquisition and Logistics Organization (DALO) has decided to acquire a Multilink Planning Tool with associated services, since DALO uses numerous Tactical Data Links (TDLs) that need to be coordinated and thoroughly planned in order to de-conflict problems. DALO intends to acquire a Solution which contains at least an Information Exchange Request (IER) database, multilink planning, import and export, and a graphical view of the planned TDLs. The Solution will be the primary planning tool used for daily operations. The Solution must import and export plans with other tools (e.g. JNDA and IRIS).
