Descriere: The Danish Defence Acquisition and Logistics Organization (DALO) wishes to enter into a Framework Agreement with one supplier regarding delivery of high flash point aviation turbine fuel of specification MIL-DTL-5624W, Grade JP-5 (F-44). F-44 is for use for ship-based helicopters. F-44 shall be delivered on DALOs Naval stations in Frederikshavn and Korsør and on Bornholm, Greenland, Iceland and the Faroe Islands. In the North Atlantic the primary ports will be Nuuk, Rykjavik, and Thorshavn, but other Locations may become relevant furthermore worldwide deliveries will be desirable. The supplier shall establish stockreserves on 100.000 liters in Denmark, exclusive stock on Bornholm and stockreserves on 50.000 liters in Greenland, Iceland, Faroe Islands and Bornholm. In North Atlantic and Bornholm, the supplier shall establish stock facilities and electronic equipped fuelstations with filtersystems according to EI/JIG Standard 1530 or equivalent. The supplier shall also be able to establish similar stock reserves worldwide if needed. The fuel must be delivered to a container or be pump directly into the ship at delivery. The yearly consumption during the Framework Agreement is expected to be 250.000 liter delivered in Denmark and 400.000 liter delivered in the North Atlantic. DALO are not able to estimate the consumption worldwide because it will depend on operational requirements, the evaluation will be based on 100.000 liter in average pr. year. The average delivery will be 30.000 liters but the deliveries will vary in the range from 5.000 liter to 70.000 liter.
